

Artificial intelligence

For a hotspot of Artificial Intelligence (AI). For reliable and widely accessible AI-systems

Artificial Intelligence has the potential to fundamentally change science, business and society. Outstanding scientists are researching and teaching at ETH Zurich and are driving the development of this key technology forward at full speed. Since October 2020, their combined expertise is bundled in the ETH AI Center.

Taking AI research to
the next level

Make a gift

Our goal

To further accelerate the interdisciplinary research and practical applications of AI, scholarships for outstanding doctoral students and postdocs are one of the most important features of the ETH AI Center. The fields of the carefully selected doctoral students range from basic research to practical applications such as robotics, digital health care, learning sciences and natural speech recognition.

The center is also meant to be an incubator for AI start-ups and to stimulate the cooperation with industry.

Your support enables

- research scholarships for highly talented doctoral students and postdocs from the entire world;
- to accelerate progress in disciplines such as medicine, manufacturing technologies, climate related research

- and many others;
- the development of reliable applications of AI that may further strengthen Switzerland as a place for innovation and accelerate economic growth.
