

Strategic projects in teaching and research (Poly Fund)

For greater freedom to quickly turn visionary ideas and extraordinary projects into reality

Everything begins with a vision – and the determination to turn it into reality. With unrestricted donations, you give ETH Zurich the freedom to realise visionary ideas rapidly, flexibly and unbureaucratically. Such as the interdisciplinary “Zurich Heart” project, which has developed an artificial heart that is almost identical to its human counterpart in terms of shape, texture and function, and which works reliably for several years, thus saving lives.

Shaping the future
together

Make a gift

Our goal

For the ETH Board, unrestricted donations to the Poly Fund serve as a catalyst in turning visions into reality and taking advantage of research and teaching opportunities. With your support, we can pursue unconventional ideas

and expedite the realisation of exceptional projects.

Your support enables

- ideas and research projects to be pursued rapidly and unbureaucratically
