

MTEC Student Innovation Fund

For the support of extraordinary projects and ideas

Shaping the future
together

[Make a gift](#)

The Department of Management, Technology, and Economics (MTEC) is providing an excellent environment for conduction of top research in the intersections of management, technology and economics. MTEC students focus on basic and applied research in management, economics, system dynamics and risks, thereby seeking to improve the understanding of the role of technology in society, industry, organisations and for individuals.

The MTEC Student Innovation Fund was developed to empower students with skills and experiences that last even beyond the door of the classroom. The funding ensures that study trips can continue to be financed, more students can afford to attend conferences and extracurricular ideas and projects can be carried out.
