

Weizmann – ETH Zurich Bridge Program

Paving the way for tomorrow's scientific discoveries

The “Weizmann – ETH Zurich Bridge Program” between the Weizmann Institute of Science in Israel and ETH Zurich is a collaborative initiative for excellent researchers and projects. Through joint research projects and the exchange of expertise, the program seeks to advance scientific excellence and develop sustainable solutions for global challenges.

Support international cutting-edge research

Make a gift

Our goal

The partnership aims to achieve significant advancements in various scientific disciplines, including natural sciences, engineering, mathematics, computer science, physics, and chemistry. Central to this initiative are collaborative research projects between doctoral and postdoctoral researchers from both institutions. Additionally, the program seeks to enhance cultural exchange and promote sustained international scientific dialogue.

Your support enables

- interinstitutional doctoral and postdoctoral projects to explore new research avenues;
- international scientific collaborations to leverage synergies and drive innovation;

- a dynamic network to promote cultural and scientific exchange.
