

Rössler laureate awarded Science Prize Marcel Benoist

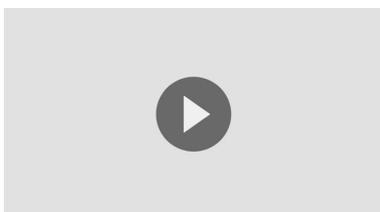

© ETH Zurich / Giulia Marthaler 6 September 2019

Another award for Rössler prizewinner Nicola Spaldin. The Professor of Materials Theory at ETH Zurich has been awarded the Swiss Science Prize Marcel Benoist for her outstanding research into multiferroic materials. Her work has laid the foundations for new ultrafast and energy-efficient data storage technologies.

The Rössler laureate from 2012 already received numerous awards in teaching and research, including the Körber European Science Prize in 2015 and the L'Oreal-UNESCO For Women in Science Award in 2017.

More on Nicola Spaldin's award in the [ETH news](#).
