Talent support of a special kind: On the occasion of its tenth anniversary celebration at the Kunsthaus Zurich, Headcount AG auctioned off ten "scientific artworks" from ETH Zurich. All the proceeds will be donated to support ETH scholarships for students with modest financial means.

The selection of artworks – pictures and exhibits by ETH researchers and students from various departments – was curated by the ETH AI Center. One of the works was provided by Excellence Scholar Rachel Sava. In an inspiring speech she explained how the scholarship encourages her to follow new scientific paths.

We would like to thank Headcount AG, the ETH AI Center and all the "ETH artists" for this great action.
