

Support for students from Ukraine

© ETH Zürich 28 March 2022

ETH Zurich supports students and researchers affected by the war with various measures. It has set up a solidarity page for this purpose: [Solidarity with Ukraine - Staffnet | ETH Zurich](#).

The ETH Foundation has allocated additional funds for support scholarships for Ukrainian students with protection status S. The admission requirements remain as strict as for all other applicants; the only difference is that the 1-year cadence period for the awarding of scholarships has been waived, so that they can be supported from their first semester onwards if their application is successful.

Anyone who would like to contribute to these support scholarships is welcome to do so via our website (with the note "Ukraine" in the comments field) or contact us directly:
